

# STRIPY HORSE PICTURE DOMINOES

## How to make:

Print off the dominoes - you can play with black and white pieces or colour them in.  
Stick the paper to sheets of card to make the pieces stronger, then carefully cut along the dotted lines around the outside of each domino.

## How to play:

Turn the dominoes upside down onto the table and mix them around.

Each player picks up 6 dominoes- don't let other players see them.

The youngest player starts, placing one domino face up on the table (it's better to play double pictures first).

The next player tries to play a domino that matches one side of what's already there. If this isn't possible he picks up a domino from the pile on the table and misses a turn.

Continue playing until one player has no dominoes left.

If no one can play all of their dominoes, the winner is the one with the fewest.
